

FL-01: What Are You Proving?

Princess Adekola

PROOF STATEMENT

My portfolio proves that I can build AI-powered backend systems. It is designed for an engineering manager hiring an AI Backend Engineer who wants evidence that I can develop reliable APIs, integrate intelligent AI capabilities, and build real-world AI-powered systems. After exploring my work, the one action I want them to take is to email me about an AI Backend Engineering opportunity.

WHY

A CV and LinkedIn can list the technologies I know, but they cannot prove that I can combine backend engineering and AI integration to build reliable, real-world AI systems. My portfolio provides that proof.
